See Yourself
as others see you

Introducing the HOYA visuReal® Video Fitting System

Compare yourself on
screen in a variety of
great frames

Finding the frames that suit you can be difficult, especially if you can't see yourself clearly without your glasses on.

Our new Hoya visuReal® Video Measurement System takes digital images as you try on different frames. You can then compare the frames on-screen and discuss the merits of each with our experienced and qualified dispensing opticians.

The visuReal® system also ensures that your glasses fit perfectly as it automatically measures your fitting dimensions to a very high precision.

For frames that look and feel great, bring along your prescription and try out our visuReal® system.
